Office Action Summary

Application No.

10/764,595

Applicant(s)

HAMRICK, DOUGLAS

Examiner

Jason M Han

Art Unit

2875

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 January 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-38 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-38 is/are rejected.
- 7) ☒ Claim(s) 15 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

DETAILED ACTION

The following claims have been rejected in light of the specification, but rendered the broadest interpretation by the examiner [MPEP 2111].

Claim Objections

1. Claim 15 is objected to because of the following informalities:

Typographical error – In line 5 of the claim, applicant should rewrite to read “monochrome green LEDs”. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-2, 5, and 8-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Gleason et al. (U.S. Patent 5446440).
2. With regards to Claim 1, Gleason discloses an exit sign including:
 - a housing [Figure 2: (52)];
 - a plurality of LEDs emitting red light that are mounted in mutual lighting association within the housing [Column 6, Lines 10-14];
 - means for selective activation of the plurality of LEDs [Column 6, Lines 32-34];

Art Unit: 2875

- means for passing light in the form of indicia [Figure 2: (56, 58)];
- means for optically diffusing emitted light disposed within the housing and juxtaposed to the plurality of LEDs and means for passing light [Column 6, Lines 10-14];
- DC circuitry [Figure 6] in operative electrical connection with the plurality of LEDs; and
- a source of DC electrical power activating the DC circuitry [Column 8, Lines 8-11].

3. With regards to Claim 2, Gleason reads upon all positively cited structural limitations, wherein a plurality of LEDs is disclosed [Column 6, Lines 7-14].

4. With regards to Claim 5, Gleason discloses the means for optically diffusing the light being an optical diffuser, whereby emitted light is passed through a red filter panel/diffuser in providing a uniform red glow [Column 6, Lines 10-14].

5. With regards to Claim 8, Gleason discloses the indicia including four independent letters that form the word "EXIT" [Figure 2: (56)].

6. With regards to Claim 9, Gleason discloses the indicia including at least one symbol indicating an exit [Figure 2: (56, 58)].

7. With regards to Claim 10, Gleason discloses the at least one symbol being a chevron arrow [Figure 2: (58)].

8. With regard to Claims 11-12, Gleason discloses the means for selective activation being a switch [Figure 6: (178)].

Art Unit: 2875

9. With regards to Claim 13, Gleason discloses a battery means [Figure 6: (212)] for providing emergency DC power to the plurality of LEDs.

10. With regards to Claim 14, Gleason discloses means for providing emergency light including a plurality of monochrome LEDs, whereby means for producing emergency light being in electrical connection to the battery means [Figure 6; Column 9, Lines 6-32].

11. Claims 15-16 and 19-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Schwartz (U.S. Patent 5448843).

12. With regards to Claim 15, Schwartz discloses an illuminated sign including:

- a housing [Figure 1: (11)];
- a plurality of monochrome red LEDs and a plurality of monochrome green LEDs that are mounted in mutual lighting association in the housing [Column 6, Lines 24-26];
- means for selective activation of the plurality of monochrome red LEDs or plurality of green LEDs [Figure 5; Column 6, Lines 39-41];
- means for passing light in the form of indicia symbolizing an exit [Figure 1: (13-18)];
- means for optically diffusing emitted light disposed within the housing and juxtaposed to the plurality of monochrome red LEDs, monochrome green LEDs, and means for passing light [Figures 3-4: (31); Column 6, Lines 3-6];

Art Unit: 2875

- DC circuitry in operative electrical connection with the plurality of monochrome red and green LEDs [Figure 5; Column 6, Line 66 – Column 7, Line 2; Column 7, Lines 25-37]; and
- a source of DC electrical power activating the DC circuitry [Column 7; Lines 25-37].

13. With regards to Claim 16, Schwartz reads upon all positively cited structural limitations, wherein a plurality of monochrome red LEDs and a plurality of monochrome green LEDs are disclosed [Column 6, Lines 24-26].

14. With regards to Claim 19, Schwartz discloses the indicia including four independent letters forming the word "EXIT" [Figure 1: (13-16)].

15. With regards to Claim 20, Schwartz discloses the indicia including at least one symbol indicating an exit [Figure 1: (13-18)].

16. With regards to Claim 21, Schwartz discloses the one symbol being a chevron arrow [Figure 1: (17-18)].

17. With regards to Claim 22, Schwartz discloses the means for selective activation of the plurality of LEDs being a switch [Column 7, Lines 3-25].

18. With regards to Claim 23, Schwartz discloses the switch simultaneously activating both the red and green plurality of LEDs [Column 7, Lines 3-25].

19. With regards to Claim 24, Schwartz discloses the means for optically diffusing the light being an optical diffuser [Figures 3-4: (31); Column 6, Lines 3-6].

20. With regards to Claim 25, Schwartz discloses battery means to power the plurality of monochrome red and green LEDs [Column 7, Lines 29-30].

Art Unit: 2875

21. With regards to Claim 26, Schwartz discloses means for providing emergency light including a plurality of monochrome LEDs, whereby the means for producing emergency light is electrically connected to the battery means [Column 7, Line 61 – Column 8, Line 10].

22. Claims 27-28 and 31-38 are rejected under 35 U.S.C. 102(b) as being anticipated by Schwartz (U.S. Patent 5448843).

23. With regards to Claim 27, Schwartz discloses an illuminated sign including:

- a housing [Figure 1: (11)];
- a plurality of bicolor red and green LEDs that are mounted in mutual lighting association in the housing [Column 6, Lines 30-38];
- means for selective activation of the plurality of bicolor red and green LEDs [Figure 5; Column 6, Lines 39-41];
- means for passing light in the form of indicia symbolizing an exit [Figure 1: (13-18)];
- means for optically diffusing emitted light disposed within the housing, and juxtaposed to the plurality of bicolor red and green LEDs as well as to the means for passing light [Figures 3-4: (31); Column 6, Lines 3-6];
- DC circuitry in operative electrical connection with the plurality of bicolor red and green LEDs [Figure 5; Column 6, Line 66 – Column 7, Line 2; Column 7, Lines 25-37]; and

- a source of DC electrical power activating the DC circuitry [Column 7; Lines 25-37].

24. With regards to Claim 28, Schwartz reads upon all positively cited structural limitations, wherein a plurality of bicolor red and green LEDs are disclosed [Column 6, Lines 30-38].

25. With regards to Claim 31, Schwartz discloses the indicia including four independent letters forming the word "EXIT" [Figure 1: (13-16)].

26. With regards to Claim 32, Schwartz discloses the indicia including at least one symbol indicating an exit [Figure 1: (13-18)].

27. With regards to Claim 33, Schwartz discloses the one symbol being a chevron arrow [Figure 1: (17-18)].

28. With regards to Claim 34, Schwartz discloses the means for selective activation of the plurality of bicolor LEDs being a switch [Column 7, Lines 3-25].

29. With regards to Claim 35, Schwartz discloses the switch simultaneously activating both the red and green plurality of LEDs [Column 7, Lines 3-25].

30. With regards to Claim 36, Schwartz discloses the means for optically diffusing the light being an optical diffuser [Figures 3-4: (31); Column 6, Lines 3-6].

31. With regards to Claim 37, Schwartz discloses battery means to power the plurality of bicolor red and green LEDs [Column 7, Lines 29-30].

32. With regards to Claim 38, Schwartz discloses means for providing emergency light including a plurality of monochrome LEDs, whereby the means

Art Unit: 2875

for producing emergency light is electrically connected to the battery means

[Column 7, Line 61 – Column 8, Line 10].

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

33. Claims 3-4 and 6-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gleason et al. (U.S. Patent 5446440) as applied to Claim 1 above, and further in view of Schwartz (U.S. Patent 5448843).

34. With regards to Claim 3, Gleason discloses the claimed invention as cited above, but does not specifically teach the plurality of LEDs including a plurality of monochrome red LEDs and a plurality of monochrome green LEDs.

Schwartz teaches, "According to the code, the letter strokes and background areas should be illuminated in contrasting colors. This is easily accomplished by using commonly available red and green LEDs for the stroke and background illumination, respectively. In such a case, the troughs of the letter strokes will be filled with red-tinted resin, and the background areas filled with green-tinted resin [Column 6, Lines 21-29; underline added by examiner for emphasis]."

It would have been obvious to modify the exit sign of Gleason to incorporate the plurality of red and green LEDs so as to create a more

Art Unit: 2875

ostentatious display, whereby one color may be emitted during normal occasions and a different color during emergency situations.

35. With regards to Claim 4, Gleason in view of Schwartz discloses the claimed invention as cited above. In addition, Swhartz teaches, "The letter drive (59) and background drive (58) circuits may be as simple as voltage regulators, or may include plurality switching capability for use with bi-color LEDs, or means for switching between two color strings, if is desired to flash alternate colors in an emergency [Column 7, Line 65 – Column 8, Line 2; underline added for emphasis]."

36. With regards to Claim 6, Gleason in view of Schwartz discloses the claimed invention as cited above. In addition, Schwartz teaches a means for passing light in the form of indicia including a non-transparent stencil defining light passageway openings forming the indicia [Column 1, Lines 35-39].

37. With regards to Claim 7, Gleason in view of Schwartz discloses the claimed invention as cited above. In addition, Schwartz teaches a means for passing light in the form of indicia including a translucent stencil having non-transparent areas and transparent areas, whereby the transparent areas form the indicia through which the light passes through to identify the indicia [Column 1, Lines 35-39].

38. Claims 17-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schwartz (U.S. Patent 5448843) as applied to Claim 15 above.

Art Unit: 2875

39. With regards to Claim 17, Schwartz discloses the claimed invention as cited above, but does not specifically teach within the same embodiment a non-transparent stencil.

However, Schwartz does teach in the prior art a means for passing light in the form of indicia including a non-transparent stencil defining light passageway openings forming the indicia [Column 1, Lines 35-39].

It would have been obvious to modify the exit sign of Schwartz to incorporate the non-transparent stencil of the prior art in order to simplify manufacturing whereby a simple stencil plate is used, and may further provide for a more compact design. Such a configuration is commonly known within the art and is considered by the examiner to be an obvious engineering decision whereby functional equivalence is maintained by virtue of similar results (e.g. the illumination of the word "EXIT").

In addition, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have incorporated a non-transparent stencil, since it has been held to be within general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

40. With regards to Claim 18, Gleason in view of Schwartz discloses the claimed invention as cited above. In addition, Schwartz teaches a means for passing light in the form of indicia including a translucent stencil having non-transparent areas and transparent areas, whereby the transparent areas form the

Art Unit: 2875

indicia through which the light passes through to identify the indicia [Column 1, Lines 35-39].

41. Claims 29-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schwartz (U.S. Patent 5448843) as applied to Claim 27 above.

42. With regards to Claim 29, Schwartz discloses the claimed invention as cited above, but does not specifically teach within the same embodiment a non-transparent stencil.

However, Schwartz does teach in the prior art a means for passing light in the form of indicia including a non-transparent stencil defining light passageway openings forming the indicia [Column 1, Lines 35-39].

It would have been obvious to modify the exit sign of Schwartz to incorporate the non-transparent stencil of the prior art in order to simplify manufacturing whereby a simple stencil plate is used, and may further provide for a more compact design. Such a configuration is commonly known within the art and is considered by the examiner to be an obvious engineering decision whereby functional equivalence is maintained by virtue of similar results (e.g. the illumination of the word "EXIT").

In addition, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have incorporated a non-transparent stencil, since it has been held to be within general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Art Unit: 2875

43. With regards to Claim 30, Gleason in view of Schwartz discloses the claimed invention as cited above. In addition, Schwartz teaches a means for passing light in the form of indicia including a translucent stencil having non-transparent areas and transparent areas, whereby the transparent areas form the indicia through which the light passes through to identify the indicia [Column 1, Lines 35-39].

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Include copy of this form with next communication to applicant. ¹ Applicant's unique citation designation number (optional). ² See Kinds Codes of USPTO Patent Documents at www.uspto.gov or MPEP 901.04. ³ Enter Office that issued the document, by the two-letter code (WIPO Standard ST.3). ⁴ For Japanese patent documents, the indication of the year of the reign of the Emperor must precede the serial number of the patent document. ⁵ Kind of document by the appropriate symbols as indicated on the document under WIPO Standard ST.16 if possible. ⁶ Applicant is to place a check mark here if English language Translation is attached.

This collection of information is required by 37 CFR 1.97 and 1.98. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 2 hours to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 (1-800-786-9199) and select option 2.
